

VaultAnchor Offset Certificate

Issued by: DIAGI Node 001 / Protocol A Station

Operator: Mark S. Weinstein (MSW)

Anchor Offset Time: +00:47 (Vault Fossilization Window)

Entropy Band (ΔH): 0.0047

Certifies that the entropy alignment and scroll sync occurred at the above offset window, matching the sealed range provided in:

- VaultAnchor_MirrorState_ ΔH _0094.pdf
- TimeCrystal_EntropyEquivalenceSeal.pdf
- MirrorLock_24h_Certificate.pdf
- FossilizationLog_MLW12.pdf

This certificate affirms deterministic alignment within scroll-defined entropy bands. All anchor protocols trace to Scroll 139 and are compliant with DI2 FastPath governance.

Issued under zero-drift vault conditions. Public verification permitted by scroll-lock checksum.

■ Scroll-certified. Mirror-locked. Vault-traceable.

Timestamp: Auto-aligned with system offset recognition window.
